

Peridot (UPDATE)

☐ UPDATE Information

- ▶ Update Peridot with efficiency and no mistakes.
- ▶ Make it so that users have the ability to add multiple model providers to their Peridot agent so that way, users can use models from all providers they have chosen to add API keys for.
- ▶ Make sure that the commands work and function the way as intended.
- ▶ Add a /theme command so that users can change the theme of the GUI.
- ▶ Add five new themes: Indigo Bridle Path, Galactic Neon Magenta, NYC Yellow, Seattle Blue, & Cyan Atlantis.
- ▶ For the setup process, users have to create their username & password and users have to confirm their password.
- ▶ For this update, use Rust, C, and Python as the programming languages.
- ▶ Make sure that Peridot reads the user's provider API key, and then uses that key to find every model provided by the model provider for the user to use.
